Avoid this game at all costs, poor quality and really should not be worthy of a place in the steam library. regardless of price I purchased it at 85% off and it's just not worth the time and effort of even installing it.. Game is way too difficult it does not give you enough time to get your pit crew ready.. the car pulls up for a pit stop and you are still preparing your crew which is extremely difficult.. the pit stop then takes about 2 minutes while the AI pit crews do it in 5-10 seconds.. Game needs to be majorly improved should not have been released like this. im sure if they fixed the problems it would be a fun game or maybe they should have just released it on mobile it would probably be easier to play... This game has so much lag and i wasted money on a boring game. well the game has near next to no content, pick a sponsor, do pit stops by moving mechanics by clicking, get money to make your mechanics a littlebit better all in order to help your drive win, that's all there is to the game. I guess the fun is ment to come from getting the lowest time and the UI doesn't help with that.

In short:

cons:

- very repetitive gameplay
- zero explanation of game mechanics
- A graphics slider option with no info about it...
- lack of much need information, like a map counter.....
- training mechanics DOESN'T WORK...

pros:

- neat idea about being a pitstop crew

About you might expect from a mobile developer not really worth \u00a3, \u00a1 maybe for a cheap bit of fun.

unlike what there webiste says this will not keep give you "great fun for weeks"
